

REMARKS

The foregoing modifies the description of the aqueous dispersion to more clearly reflect the EUDRAGIT L 30D-55 spec. sheets previously submitted. The latter explicitly indicate a range surrounding the 30% value, making clear that it is not necessary to use a particular value of dry polymer substance.

The Commissioner is hereby authorized to charge any fees associated with this response or credit any overpayment to Deposit Account No. 13-3402.

Respectfully submitted,
